Art Unit: 3731

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Peshkin et al. (5,799,055). Peshkin et al. disclose a method for use in conjunction with a c-arm imaging apparatus (col. 7, lines 26-30), for positioning a biopsy needle (col. 1, lines 26-29) substantially as defined in claim 2 (col. 7, line 24 to col. 9, line 13). The Peshkin et al. specification fails to specifically indicate that the location information of the target is stored by computer 40. However, it would have been obvious that the information is stored by computer 40 since such storage of information is typically performed by a computer.
